

d6+ Communication

Improved and simplified communication
between communities, schools and their end-users
with the d6 Connect Application

#SimplifiedCommunication

The d6 Connect Application has been designed to simplify and improve the effectiveness of communication and allows end-users to receive information from their school, club, church, estate and business all in one application.

#ConnectingCommunities

Key Functionality

Consolidated communication platform

- > Communicate through the d6 Connect Application, Email and/or SMS
- > Communicate to predefined channels or individuals
- > Choose your preferred communication method including least cost routing (first Application notification, then email then sms)

Set up Communication Categories

- > Create folders in which any amount of resources can be shared
- > Resources can be shared to channels or individuals

Set up Contributors

- > Include any number of communication contributors to the platform
- > Provide specific rights to contributors (author, editor, moderator)

Manage Calendar events

- > Create any number of calendars and link end-users or channels to the calendar
- > Ability to link current calendars to the created calendar

Set up your Organisation

- > Set up your organisation and contact information
- > Create your organisations look and feel in d6 Connect

Set up Communication Channels

- > Set up private or public channels and link any number of users to these channels
- > Link a calendar (Google or iCal) to any channel and manage events to that channel
- > Share resources to a channel

d6 Connect Mobile & Desktop Application

- > Follow multiple organisations via one Application
- > Allow for authenticated communication to specific end users
- > Send out questionnaires with multiple feedback types including files
- > Share notices, calendar events, resources (files and photos)
- > Facilitate two way communication between end-user and organisation
- > Send push notifications via the app for notices, calendar events and new resources
- > Allow end users to update their information via the Application
- > Cashless payment solution available for ad-hoc payments.

Benefits

- > No need to manage multiple communication platforms (email, sms and app).
- > Keep all your end-users informed about important information from your school or organisation with a push notification capability
- > Use the platform for effective communication to predefined groups whether private or public
- > Reduce communication costs (sms and paper) with the use of the d6 Connect Application.
